UoM-SES team with stakeholders

¹ Dean of department of urban and regional planning at the Ethiopian Civil Service University. Apart from teaching and research he have worked in many government positions in different sub-cities in Addis Ababa. He have a very big experience in the case of informality as a

Introduction

On April 21/2018 a half day stakeholder training was organized in Mekelle by UoM-SES team as part of the stakeholder and community engagement work package of SES project.. The participants on the stakeholder training were invited from the following institutions

- Tigray regional urban planning office
- Mekelle municipality
- Professionals from the nine sub-cities of Mekelle
- Residents' representatives from the different sub-cities of Mekelle
- Mekelle University staff members
- Dr. Daniel Lirebo as Presenter from Ethiopian Civil service university
- All the UoM SES team members

The intention of the training was to give training about informal urban settlements and informal settlements in Ethiopia, the reason behind their occurrence and their housing characteristics.

Training on the workshop

Dr. Daniel Lirebo¹ was the expert invited to give the training on the informal urban settlements in Ethiopia. The training was mainly focused on defining

researcher and professional. He was invited as a keynote speaker for the local stakeholder training by the UoM-SES team.

informal settlement from professional perspective, on local cases of informal settlements from national level to specifically focusing on the case of Addis Ababa. Especially the presentation in focus of Addis Ababa was very interesting for the attendants, as he has presented the case from his own personal experience as a sub-city official.

Dr. Daniel Lirebo's presentation

From the training, the participants were able to understand the context at national level and has helped them to forward and discuss their perspectives on the current situation of informal settlements in Mekelle.
